In addition, the amalgamation will not dilute the position of the Transferee Company generating predominantly Priority Sector Lending (“PSL”) loans as majority portfolio of Transferor Company is PSL eligible;
- (iii) pooling of resources, creating better synergies, optimal utilisation of resources and greater economies of scale;
- (iv) better administration and cost reduction (including reduction in administrative and other common costs);

5.2. Bandhan Bank Limited

Based on the share capital of BBL as at 30th September 2018, and the outstanding options (including unexercised options) at that date, we have considered the diluted equity share capital of BBL was ~ INR 11,950.2 million consisting of 1,19,50,25,669 equity shares of face value of INR 10/- each fully paid up.

6. APPROACH – BASIS OF AMALGAMATION

- 6.1. The Scheme contemplates the Proposed Merger under Sections 230-232 of the Companies Act, 2013 and rules issued thereunder to the extent applicable.
- 6.2. Arriving at the Fair Equity Share Exchange Ratio for the purposes of a merger such as the Proposed Merger, in accordance with the IVS would require determining the relative values of each company involved and of their shares. These values are to be determined independently but on a relative basis, and without considering the effect of the merger.
- 6.3. The three main valuation approaches are the asset approach, market approach and income approach. There are several commonly used and accepted methods including those set out in the IVS, within the market approach, income approach and asset approach, for determining the relative fair value of equity

shares, which can be considered in the present case, to the extent relevant and applicable, to arrive at the Fair Equity Share Exchange Ratio for the purpose of the Proposed Merger, such as:

- a. Asset Approach including
 - Net Asset Value (NAV) Method
 - b. Market Approach including
 - Market Price Method
 - Comparable Companies Multiple (CCM) Method
 - c. Income Approach including
 - Discounted Cash Flow (DCF) Method
 - Earning Capitalization Value (ECV) Method
- 6.4. It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies / businesses, and other factors which generally influence the valuation of companies and their assets.
- 6.5. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.
- 6.6. **Asset Approach:** The asset based valuation technique is based on the value of underlying net assets of business either on a book value basis or realizable value basis or replacement cost basis
- a. **Net Asset Value Method:** The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This valuation approach may be used in cases where the assets base dominates the earnings capability. A scheme of arrangement would normally be proceeded with, on the assumption that the companies would merge as going concerns and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book values.
- 6.7. **Market Approach:** Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.
- a. **Market Price Method:** Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded. The market value generally reflects the investors' perception about the true worth of the company, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of a merger, where there is a question of evaluating the

shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard.

- b. **Comparable Companies Multiple (CCM) Method** : Under this method, one attempts to measure the value of the shares / business of company by applying the derived market multiple based on market quotations of comparable public / listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company / business (based on past and / or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

6.8. **Income Approach**: Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

a. **Discounted Cash Flow (DCF) Method**:

Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm.

Such DCF analysis involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to the providers of the company's capital – both debt and equity.

Appropriate discount rate to be applied to cash flows i.e. the cost of capital:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

- b. **Earnings Capitalization Value (ECV) Method**: This method involves determination of the maintainable earnings level of the company from its operations, based on past and / or projected working results. These earnings are then capitalized at a rate, which in the opinion of the valuer combines an adequate expectation of reward from the enterprise risk, to arrive at the value of the company.

Out of the above methods, we have used approaches / methods as considered appropriate by us. The values arrived at under such approaches / methods has been tabled in the section 7 of this Report.

7. **BASIS OF FAIR EQUITY SHARE EXCHANGE RATIO**

- 7.1. The fair basis of the Proposed Merger would have to be determined after taking into consideration all the factors, approaches and methods considered appropriate by the respective Valuer. Though different

values have been arrived at under each of the above approaches / methods, for the purposes of recommending the Fair Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the Companies involved in a merger such as the Proposed Merger. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of the Companies but at their relative values to facilitate the determination of a Fair Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach / method.

- 7.2. In the ultimate analysis, valuation will have to be arrived at by the exercise of judicious discretion by the valuer and judgments taking into account all the relevant factors. There will always be several factors, e.g. quality of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single exchange ratio. While we have provided our recommendation of the Fair Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Fair Equity Share Exchange Ratio of the equity shares of GFL and BBL. The final responsibility for the determination of the exchange ratio at which the Proposed Merger shall take place will be with the Boards of the Companies who should take into account other factors such as their own assessment of the Proposed Merger and input of other advisors.
- 7.3. The Fair Equity Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of GFL and BBL based on the various approaches / methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these Companies, having regard to information base, key underlying assumptions and limitations.
- 7.4. We have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of the value per equity share of GFL and BBL. To arrive at the consensus on the Fair Equity Share Exchange Ratio for the Proposed Merger, suitable minor adjustments / rounding off has been done in the values arrived at by the Valuers.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Fair Equity Share Exchange Ratio for the Proposed Merger whose computation is as under:

The Computation of Fair Equity Share Exchange Ratio as derived by DHC, is given below:

Dear Sirs,

Sub: Proposed merger of GRUH Finance Limited ("GRUH") with Bandhan Bank Limited ("Bandhan Bank" or the "Company") ("Proposed Transaction")

Bandhan Bank Limited has requested us to issue a fairness opinion ("Opinion") from a financial point of view of the Equity Share Exchange Ratio (as defined below) in relation to the Proposed Transaction.

Proposed Transaction background: Bandhan Bank and GRUH are proposing to enter into a scheme of amalgamation, which envisages merger of GRUH with Bandhan Bank, both listed on stock exchanges in India.

Our scope is restricted to providing an Opinion on the Equity Share Exchange Ratio for the merger of GRUH with Bandhan Bank.

In arriving at our Opinion, we have reviewed historical financial and listed stock price data. We have also reviewed certain publicly available information, and have taken into account such other matters as we deemed necessary including our assessment of general economic, market and monetary conditions. We have also reviewed the joint valuation report by SRB & Associates & Desai Haribhakti & Co. dated January 7, 2019 for the Proposed Transaction recommending Equity Share Exchange Ratio of 568 fully paid up equity shares of Bandhan Bank of face value Rs. 10 per share to be issued for every 1,000 fully paid up equity shares of GRUH of face value Rs. 2 per share (Equity Share Exchange Ratio). We have also assumed that the final Equity Share Exchange Ratio will be substantially the same in the scheme as discussed with you and reviewed by us.

We have received management representation letter from Bandhan Bank dated January 7, 2019 ("Management Representation Letters").

Further, we have had discussions with SRB & Associates, the valuation advisor, on such matters which we believed were necessary or appropriate for the purpose of issuing this Opinion.

Based on our examination and according to the information and explanation provided to us, we note that the Proposed Transaction entails Amalgamation of Bandhan Bank and GRUH.
